THE MILBANK MEMORIAL.

A GIFT OF ONE OF THE TRUSTEES OF TEACHERS' COLLEGE.

IMPRESSIVE OPENING EXERCISES -ADDRESSES BY SPENCER TRASK, THE REV. DR. C. D'W. BRIDGMAN AND DR. SANDERS.

The opening of the Milbank Memorial yesterday afternoon was an event in the history of Teachers' College. The memorial forms the western wing of the college, and completes the quadrangle of the splendid group of buildings that forms this wellknown educational institution. The memorial is the gift of Joseph Milbank, one of the trustees of Teachers' College, and stands in memory of his father and mother. It contains the offices and classrooms of the department of history, English, mathematics, Latin, Greek, kindergarten and music; the lecture-rooms and laboratories of the departments of domestic science and art and biologial science, the classrooms of the Horace Mann School, luncheon-room and bicycle storeroom, the study hall and chapel.

It was in the chapel yesterday that the impressive opening exercises were held, and between two and three hundred guests were present. The trustees, faculty, speakers and a number of guests assembled in the trustees' room and formed a procession, entering the chapel two by two, and occupying seaton the rostrum.

After prayer by the Rev. Dr. W. C. P. Rhondes Spencer Trask, chairman of the Board of Trustees made a few introductory remarks. He said:

"It is a rare thing for a man to reap a second glory through his son after he has gathered in his own harvest. But it is a beautiful thing and appeals strongly to our imagination when a son can say. Thou art my father, and thy deeds are mine. We see it to-day in this noble building, bearing its crown of beauty, of color and of form, delighting the eyes and stimulating the mind by the thought and suggestion of its far-reaching possibility of usefulness and probabilities of influence on the lives of generations yet unborn.

This building has been erected by one of our trustees in memory of his father and mother. ems but right that some word should be said o him whose name this beautiful building bears, and yet what word is more fitting than that one glad evangel. 'The good die not,' and the illustration of that word as we look around us here? Those that follow me will speak more eloquently on this point from that personal knowledge of the man which was denied me, but no one can feel and appreciate more deeply than I and those for whom I speak what this building means to us. It gives form and substance, as it were, to the dreams dreamed so long ago, and which, in fact, seemed then only a little more than the baseless fabric of a dream and

little more than the baseless fabric of a dream and as little likely of realization.

"The germ of the Teachers' College was an Industrial Association, its first public exhibition being composed of the handiwork of its pupils. This building is the full flower, complete in all its appliances and rounding out our group of buildings representing the perfect, finished product as compared with the crude specimens of years ago. The last decade has marked a wonderful advance in the demands for broader education and better standards. The ideals toward which we strive are higher. We have entered upon a new era of education, and more and more is there necessity for adequate accommodations and methods for this progressive science. And, now, in the name of all those for whom I speak, I thank Mr. Milbank for his beautiful and gracious gift."

DR. BRIDGMAN'S ADDRESS.

DR. BRIDGMAN'S ADDRESS.

Following Mr. Trask's address was one by the Rev. Dr. C. D'W. Bridgman, the old personal friend and pastor of Mr. and Mrs. Jeremiah Milbank. Dr. Bridgman spoke of the life and character of the couple, and he said: "Through all the formal exercises of this hour

"Through all the formal exercises of this hour we must be conscious of a tenderer strain than flows from speech of lips. It is that of a filial, thankful heart in praise of dear ones who have passed away. It adds a pathetic interest to this service. For this structure, with its ample equipment, is something more than a symbol of the cause of education; it is more than a symbol of the widening sense of the worth of the Teachers College. It stands here in its solid strength as the offering of affection; it is the thoughtful, noble utterance of a love that has not lost its ardor with the passing years and which is inscribed on the bronze tablet near the door. In Memory of Jeremiah and Elizabeth Lake Mijbank, whose practical helpfulness and charity are thus commemorated by their son.' Not far away there is another building nearing completion, reared from the same motive, to serve the same purpose, and bearing the same family name. It tells us of the daughter's love. So are these parents honored by these esparate shrines. So their names are linked forever by their children's names with the cause of hisher education."

Dr. Bridgman went on to speak of the strong and admirable characters of his late friends and parishloners, citing their quiet yet far-reaching and beautiful philanthroples. He was followed by the Rev. Dr. Henry M. Sanders, the pastor and warm personal friend of Joseph Milbank, the donor of the memorial.

VALUES OF EDUCATION.

Dr. Sanders's address was on the value and responsibilities of education and wealth. He dwelt at length on the responsibility of men who possess large fortunes. They should realize that wealth is an especial ziff of God, and should be used for His giory. He spoke of the power that great wealth bestowed upon its possessor, and that the world looked to its rich men to brighten and broaden and beautify and uplift its experiences and experiments and philanthropic measures. A thread of sunny humor ran through the discourse and brought out appreciative smiles on the faces of those present. A graceful tribute was paid to Miss Grace Dodge, who, as treasurer of the Board of Trustees, was seated near by on the rostrum.

When Dr. Sanders concluded, Mr. Milbank arose and expressed his appreciation of the beautiful words spoken by his friends and the friends of his parents. He then presented the keys of the building to Mr. Trask, who gracefully accepted them, stating that, though there were keys to the building, its doors would always be wide open to the men and women who should come for the help offered in the broad curriculum the institution would always maintain.

The benediction was then pronounced by the Rev. Dr. Rhodes, after which the assembled guests were shown over the building. The beautiful rooms and corridors were in gain attire and met the enthusiastic approval of the visitors. Palms, ferns, chrysanthemums and roses were in evidence as decorations.

anthemums and roses were in evidence as decorations.

The memorial was erected at a cost of \$250,000 and is a superb structure. The chapel is the jewel of the building, and is finished in quartered oak, the color scheme of the ceiling and walls being dull green and gold. There are five rich stained-glass windows that were made in London. The woodwork is of quartered oak, and there is a fine, two-manual organ to the right of the rostrum.

The chapel-master, Gustav Viehl, gave a recital on the new instrument before and after the opening services.

A TEACHER APPRECIATED.

Miss Julia Richman has taught in the public schools of this city for twenty-five years. She has been for thirteen years principal of the school she now supervises, at No. 400 East Eighty-sixth-st., and has also taught in public schools, at East Fifty-seventh-st, and East Forty-sixth-st. Miss Richman is principal of the grammar and primary departments, which is an unusual thing, and was the first woman teacher to be intrusted with such responsibility. She is a teacher of much force and erudition, and understands to a superlative degree the characteristics of children. Her success has been remarkable in her long career, and she possesses a remarkable and indemitable perseverance.

Miss Anna Lindenberg exhibited designs and glass decorations, and Miss Thomas Neilson miniatures. The underglaze was one of the features of the exhibit, and attracted much attention. Most of it

exhibit, and attracted much attention. Most of it was finished with a soft instead of a hard glaze, and these artists are almost the only ones who have ever succeeded with the soft glaze. The perfection they have attained is the result of the experiments of years, conducted at a great expenditure of time and money. The women have worked together, each one contributing her tileus to the general stock, and this little underglaze club was the neucleus of the present association.

Mrs. Pollon's exhibit consisted of tile work, which has just been returned from Nashville, it was finished with the hard glaze, and is designed for the decoration of a private house. > The New-Jersey Society, Daughters of the Revo lution, opened the season's proceedings last week by a reception, given at the residence of Mrs. Louis De Blois Gallison, No. 103 Henry-st . Orange. The function was largely attended by members of the society, and the guests included the presidents of the women's clubs in every town where the society has a chapter, and also representatives of other patriotic organizations.

The rooms were tastefully decorated with flowers, the society's colors appearing in the blue vase Mrs. A. W. Bray, assisted by the other officers of the society, received the guesta upon entrance. A pleasant feature connected with the occasion was nat it also celebrated the ninety-fourth birthday of Mrs. Caroline Long Bartlett, a member of the so-clety and an "original Daughter." Mrs. Bartlett is the daughter of Moses Long, a Massachusetts soldier, who served three years in the War of Independence under General Lee. Flowers in profu sion were sent to this "birthday child," and, on behalf of the general society, Miss A. W. Sterling handsomely engraved parchment certificate of honolution, the first awarded to a real Daughter. Mrs. Bartlett, who is as bright and active in mind as though she numbered but three score years, was deeply touched by the remembrance, and uttered her thanks through her daughter, Mrs. Gallison.

After this pleasant incident the guests enjoyed a fine musical and literary programme. Mrs. L. Louis Clearman and Miss Guelma Baker sang several charming solos, and Miss Cobb played a Liszt rhapsody. Mrs. Joseph P. Geran, of Brooklyn, read an interesting and amusing paper on "Courtiship and Marriage in Revolutionary Days," depicting the wooling of her great-grandparents just after the war. Mrs. Henry Sanger Snow, president of the general society, made a short, spirited address, full of suggestions for patriotic work. SPICES AND CONDIMENTS.

any valid foundation. Probably there is no arti-cle that is used as food or used as seasoning to find that has not at one time or another been condemned as injurious. Even salt, which science has proved to be essential, supplying daily needs of the body, has been, at different times, condemned. It has been proved that rich foods, con taining fats so necessary for supplying the fire life with fuel, are much more eastly digested i demned as fit only for "palates grown callous al-most to disease," when properly used, is a wholesome stimulant to the digestive powers. A piece of cold roast meat is much more easily digested, as well as more palatable, if it is served with mustard or mustard pickles, which many worthy per-sons look upon as food to be avoided alike on, hygienic and temperance grounds.

There are some people who conscientiously be-lieve that spices, mustard and other condiments

are a direct cause of intemperance. There are few things so likely to cause a desire for alcoholic few things so likely to cause a desire for automotive stimulants. A piece of cold beef, served without mustard or any other condiment, is more likely to cause indigestion than almost any article of food. A piece of boiled lobster requires considerable more to digest than a lobster salad, properly served in a smooth mayonnaise, which stir the digestion and is soothing and agreeable to the taste A plum pudding, properly spiced and seasoned, is

a rich and a nutritious article of food, not as likely to incite the evil spirits of dyspepsia as an under-done potato or a slice of cold beef unseasoned. SPICES NECESSARY TO HEALTH.

It is therefore necessary to health, as well as to good appetite, that every housewife should keep a proper supply of spices in the store closet. The spices for the new year are usually sent to market in October and November, and this is the best

There is a vast difference between the fresh new spice and the old stock, from which all the essential oils have evaporated. Nutmeg and mace, which are produced from the same tree, though their flavor is quite different, both depend for their value on a volatile essential oil. This soon evapo-rates if the spices are not kept closely shut up in

WEDDINGSPASTANDTOCOME

The marriage of Mrs. Ellen Prince Lowery, a niece of the late William R. Travers, to James Speyer was solemnized at noon yesterday at the home of the bride, No. 32 West Thirty-fifth-st. There were no persons present at the ceremony save the immediate relatives of the bride and the business associates and personal friends of the bridegroom, whose best man was his brother, Edgar Speyer, the head of the banking-house of Speyer & Co., in London. There were neither bridesmaids, maid of honor nor ushers. Mrs. Lowery, in a reception gown, was escorted to Bishop Potter, who performed the marriage ceremony, by John Dyneley Prince. As the bridal pro-cession passed from the hallway, some of the choristers from Grace Church choir sang the bridal anthem, and later sang an appropriate hymn. APPROPRIATIONS MADE BY THE METHODIST

EPISCOPAL COMMITTEE. Philadelphia, Nov. 11.-The General Missionary Committee of the Methodist Episcopal Church resumed its session this morning, Bishop Andrews, of New-York, in the chair. The question of the d vision of the appropriation to domestic and foreign missions was discussed at some length. amount appropriated was \$1,139,940, and \$40,000 addi-

missions was discussed at some length. The total amount appropriated was \$1,130,940, and \$40,000 additional was appropriated for contingent expenses and \$20,000 for incidental expenses. It was decided to make the division of the missionary funds on the basis of 45 per cent to home missions and 55 per cent to foreign missions.

The total sum appropriated for home missions was then distributed as follows:
Welsh—Northern New-York, \$300; Philadelphia, \$400; Rock River, \$450; Wyoming, \$20.
Swedish—Austin, \$1,340; California, \$2,232; Central, \$200; Rock River, \$450; Wyoming, \$20.

DAUGHTERS OF THE CONFEDERACY.

ADMISSION OF THE VIRGINIA DIVISION-SOCIAR FEATURES OF THE CONVENTION. Paltimore, Nov. 11.-The fourth annual convention

Pattimore, of the Confederacy resumed its sessions to-day, holding one in the morning and another at night, the interim being devoted to a another at night, the interim being devoted to a reception and tea at the Confederate Soldiers' Home at Pikesville, a suburb of Baltimore. At the morning session the time was largely devoted to details pertaining to the admission of the Grand Division of Virginia. It was voted that the division should have a full vote on the floor on all vision should have a full vote on the floor on all questions. The division joined the united society as a grand division, not as a chapter. As both organizations have exactly the same aims and objects, it was held to be most desirable to consolidate forces. The only question was as to the man-ner of the consolidation. The grand division pre-

Witmer Stone, Philadelphia; Ruthvan Deanne, Chi cago; Leverett M. Loomis, San Francisco; George H. Mackay, Boston; Otto Widmann, Old Orchard, Mo.; A. W. Anthony, San Diego, Cal.; E. H. Forbush, Malden, Mass.; Mrs. E. Irene Rood, Chicago; Mrs. Julia Stockton Robins, Philadelphia; Miss Florence A. Merriam, Washington; Mrs. Olive

Thorne Miller, Brooklyn; Mrs. L. M. Stephenson, Helena, Ark., and Dr. T. S. Palmer, Washington. Mr. Dutcher prefaced his report as follows: While thousands of leaflets have been distributed and column after column has appeared in the public press relative to the frightful cruelty necessitated by the use of wild birds' feathers for millinery ornamentation, yet the plea of the great majority of the women who still use feathers as ornaments is that of ignorance. It is largely due, I think, to an unwillingness to assume individual responsibility. Most women know the crueity, and not only the crueity, but the injury, to agricultural interests, yet they excuse themselves by saying. The birds are not killed for me personally; they would be killed, anyhow. In other words, unless the wearer has a particular bird killed for her particular use she will not assume any responsibility. It certainly is a curious and inconsistent thing to visit a church or lecture-room and listen to a discourse on some philanthropic subject, and note the extreme sympathy displayed by scores of women, while at the same time their hats are decorated with plumes and feathers that could only have been obtained by acts of the greatest crueity."

The committee urged that its work be transferred to one individual who could give his whole time to it. Reports were then read from the various States on the progress of bird protection. These reports showed that Audubon societies have been organized in most of the States, and that decided advantages have resuited in the passage of laws to protect song and insectivorous birds in many of the States. Bird Day has been included with Arbor Day in two or three States, and efforts are being made to secure its observance in others. Reports from some of the Western States were discouraging, in that they told that the use of aigreties, feathers and birds on hats was more popular this year than ever before.

In concluding his report Mr. Dutcher recommended that a compilation of the bird laws of the several States be made, and a uniform law be drafted for use in all parts of North America, and, further, that the law should prevent the ransportation by public carriers or Individuals from one State to another. He added that the salution of the bird problem press relative to the frightful cruelty necessitated by the use of wild birds' feathers for millinery
